❖ Salient features of Questionnaires

1. Students can give not just quantitative but qualitative feedback also. In each questionnaire there is a descriptive feedback section which asks students to provide supporting rationalization for particular rating given and further suggestions to improve on. This helps us to understand students' perspective to look at things while recording feedback, to read through their mind and their exact requirements.
2. Students record their feedback by giving ratings on a linear scale. For an individual aspect/question a linear scale of 0-4 or 0-5, whereas for overall rating and support services a relatively broad range scale i.e. 0-10 is deployed to have wider scope for rating.
3. Students can choose to remain anonymous while recording feedback. Identity of the student is never revealed to anyone in any manner. This certainly encouraged students to record their feedback and express their views fearlessly.
4. All the questionnaires are developed in both English and Marathi – a regional language. This helped students to understand questions better.

✚ Circulation of the Questionnaire among Intended Respondents

- An eco-friendly green practice for collection of feedback is used. All the questionnaires are framed into Google Forms. For ease of handling six different Google Forms were created.

- Projects and some reserch can definitely help us to develop our interest in the subject.
